## ABOUT ME

Engineer by training, builder by instinct. Specialized in AI & Data focused on designing intelligent systems and automations that solve real business problems. Looking to grow in challenging business environments where ambition and technology move at the same pace.

## EDUCATION

-  Luther King Sur - Technical High School  
2020-2022 - Tenerife, Spain
-  U-tad University - AI Software Engineer  
2022-2026 - Madrid, Spain

## SKILLS

- Python
- Machine Learning
- LLMs & RAG
- LangChain
- Azure Functions
- Dynamics 365
- Power Automate
- n8n

## EXPERIENCE

### AI Software Engineer - Arbentia

03/2026 - Present Madrid, Spain

Developing enterprise solutions for Microsoft Dynamics 365 clients as part of the CE & AI department. Designed and deployed a cloud-based SMS automation integrating Dynamics 365 with a third-party provider via Azure Functions and Service Bus. Built custom Power Apps, automated business workflows with Power Automate, and contributed to Business Central implementations.

### Project Manager - U-tad

11/2024 - 05/2025 Madrid, Spain

Led a cross-functional team of 7 Software Engineering students to redesign and improve an internal university tool. Managed the full project lifecycle using Scrum methodology, coordinating sprints, aligning stakeholders, and contributing as a developer across frontend and backend. Delivered as a real client engagement with the university itself.

### Tech Sales & Support - Macys Digital

06/2024 - 09/2024 Tenerife, Spain

Provided technical support to clients including device migrations, software troubleshooting, and new device setup. Managed product and inventory data using SQL queries in the company's internal ERP system.

## Projects

Passionate about building things outside of work. Check out my personal projects and experiments at my
